NATIONAL SECURITY COUNCIL
NET EVALUATION SUBCOMMITTEE

25 July 1956

MEMORANDUM FOR THE DIRECTOR OF CENTRAL INTELLIGENCE

Subject: CIA Contribution to the 1957 Net Evaluation.

1. You will be interested to know that the Agency has made available to the Director, NESC Staff, some 2,300 square feet of Quarters Eye for the period 8 August - 8 September.

2. The NESC requirement for this space results from the fact that the Joint Operations Analysis Group must vacate the National War College by 8 August. The operations analysis will have been concluded by that time and most of the JOAG personnel will have been dismissed, but some forty must be held over for up to thirty days to compile the final JOAG report. Adequate space for them was not procurable through the Defense Department. On my application to Colonel White, he found the space in Quarters Eye. It was luckily available because one unit had already vacated it and the successor unit was not due to move in until 15 September.

3. General Thomas is deeply appreciative of this accommodation and may mention it when he sees you on Tuesday, 31 July.
